ABOUT ME

I am a frontend developer with 3 years production-level experience in frontend development. Adopting best practices, I pride myself as being skilled at implementing design features and building scalable web applications that go on to engage over 1000 users. I'm a firm believer of the mobile-first approach and a strong upholder of the mantra, "fewer lines make better code".

I am a self-motivated and detail-oriented person who solves problems using creative thought processes that are unique. My area of skills proficiency includes but is not limited to HTML5, CSS3, Scss, Javascript, Typescript, React, Redux, Firebase, PHP, and MySQL

WORK EXPERIENCE

Software Engineer (Frontend)
ALX [16/08/2022 – Current]

City: Nairobi
Country: Kenya

Summarily, this 12-month training programme is all about learning the basics of software engineering by engaging with foundational programming courses, and working on projects in an agile environment alongside peers to strengthen programming muscles, and build great interpersonal relationship, communication and collaboration skills. So far, during the course of this training, I've used technologies like;
1. Shell script
2. Ruby
3. Brainfuck
4. C
5. Python
6. HTML
7. CSS
8. Javascript
to solve given project tasks as shown in my github repositories.

Frontend Developer
Zuri Team, Inc. [07/05/2022 – 11/08/2022]

City: Aba

Country: Nigeria

1. Transformed numerous UI designs to web pages using HTML/CSS/JavaScript, thereby sharpening my frontend skills in the process by x2 during the 3 months internship.

Frontend Developer
Treasure Printing Press Nig. Ltd [09/05/2022 – 13/08/2022]

City: Aba
Country: Nigeria

1. Trained a dozen teenagers on how to build a website from scratch using HTML, CSS, JavaScript, with a little introduction to ReactJs as an additional package.

Software Engineer
Learnfactory NG [18/07/2019 – 21/12/2019]

City: Aba
Country: Nigeria

Learnfactory served as a solid foundation where I used several software development technologies such as;
1. HTML5, CSS3, JavaScript, Reactjs, MongoDB, Nodejs, and Express.
to build simple web apps, set up simple servers and work with databases.

Web developer
Self-employed [01/01/2020 – Current]

City: Aba
Country: Nigeria

Proffering web solutions to the business problems of clients by building web applications that engage effectively and efficiently with their users.
1. I adopt the services of HTML5, CSS3, JavaScript, Reactjs, PHP, Firebase and mySQL to build projects that pay attention to details and solves client's needs.

Web developer
Oxfords International School [12/04/2020 – 03/11/2020]

City: Aba
Country: Nigeria

It was a COVID-19 lockdown job in a school. During my stay in the school, I adopted the use of technologies like HTML5, CSS3, JavaScript, PHP, and mySQL. I also carried out some database administrator responsibilities.

* Built and maintained the school website.
* Uploaded lesson materials of different formats to the database on a weekly basis to enable students become up to par with their school curriculum/syllabus despite the enforced sit-at-home in the country.
* Periodically integrated timed test and exam questions.

EDUCATION AND TRAINING

B.Eng, Computer Engineering
Michael Okpara University of Agriculture, Umudike. [12/09/2015 – 23/08/2020]

Country: Nigeria

React Developer
Zero to Mastery Academy [25/09/2022 – Current]

Website: https://zerotomastery.io/

PROJECTS

Techpreneur Girls

[01/06/2022 – 25/08/2022]

Techpreneur is a national initiative that is geared on The Advancement of S.T.E.M Education for students in public and private schools in Nigeria. It is a platform where students are inspired and tasked to provide solutions to their community. This is a project I built for a client using HTML5, CSS3, and JavaScript for the frontend, then adopting the services of PHP and mySQL for the backend and database.

Oxfords International School

[20/04/2020 – 12/05/2020]

The school, which happens to be my alma mater, needed a platform where the students could still cope up with their lessons and tests while staying at home during the COVID-19 lockdown. Yes I know it's screaming "Beginner! Beginner!!" 😁 but that's because this is the first project I ever built as a developer. I included it in this Resume to show how much I've grown in my tech career and how much my skills have improved. **Skills:** *HTML, CSS, Javascript*.

Mosco Shopping Store

[05/10/2022 – 29/01/2023]

A scalable e-commerce progressive web application built with React for the frontend, and Firebase as a database for holding the shop items. I used Redux for the complex state management of the carts and users. This project enabled me to learn about some nuances of typescript (as I later converted it from .js to .ts) and PWAs. **Skills:** *HTML, Scss/Styled components, Javascript/Typescript, Redux, Firebase*.

HONOURS AND AWARDS

Certificate of Completion for the "Complete React Developer 2023" course

Udemy [29/05/2023]

A react course that spanned across several topics and concepts in React and associated with React. Ranging from basics to react-router to hooks to redux to css-in-js/styled-components to typescript, and even concepts like PWAs.

TECHNICAL SKILLS

Tech Stack

1. HTML5
2. CSS3
3. Sass/Less
4. Styled components
5. Javascript
6. Typescript
7. ReactJs
8. Redux
9. DOM manipulation
10. RESTful API
11. Mobile Responsiveness
12. Performance Optimization
